SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

ENGINEERING DIVISION

MEMORANDUM

DATE: April 22, 1991
TO: Managers and Supervisors
FROM: Nick Nikkila /s/ by DES for Nick
SUBJECT: Applications For Architectural Coating Equipment

Amendments to Rule 219 are anticipated to go before the Governing Board in September or October 1991. One of the anticipated changes is the addition of an exemption for portable spray equipment used exclusively for architectural coating operations (i.e. coating operations subject to Rule 1113). Attached is a summary of pending applications for this type of equipment and the distribution of these applications throughout the division*. Please suspend processing of these applications at this time until the anticipated changes in Rule 219 are heard by the Governing Board.

If the Governing Board does exempt these units from the requirement to obtain a permit, I anticipate we will, at that time, return the applications to the applicant along with a refund of their application fee.
